### Denver Developmental Screening Test II

The Denver Developmental Screening Test was introduced in 1967 to identify young children, up to age six, with developmental problems. A revised version, Denver II, was released in 1992 to provide needed improvements. The purpose of the tests is to identify young children with developmental problems so that they can be referred for help. The tests address four domains of child development: personal-social, fine motor and adaptive, language, and gross motor. They are meant to be ...
