International trade and the accompanying financial transactions are generally conducted for the purpose of providing a nation with commodities it lacks in exchange for those that it produces in abundance; such transactions, functioning with other economic policies, tend to improve a nation's standard of living.

international trade | Definition, History, Benefits ...

international trade. The exchange of goods or services along international borders. This type of trade allows for a greater competition and more competitive pricing in the market. The competition results in more affordable products for the consumer. The exchange of goods also affects the economy of the world as dictated by supply and demand, making goods and services obtainable which may not otherwise be available to consumers globally.
