Gastrointestinal System Flashcards | Quizlet

Adrenalectomy - This procedure removes growths in the adrenal glands. The adrenal glands are found on top of the kidneys and make hormones that are needed to help the body work properly.
Appendectomy - This procedure removes an infected appendix (the small finger-like pouch at the end of the large intestine).

Gastrointestinal Surgical Procedures - Penn Medicine

The gastrointestinal tract, (GI tract, GIT, digestive tract, digestion tract, alimentary canal) is the tract from the mouth to the anus which includes all the organs of the digestive system in humans and other animals. Food taken in through the mouth is digested to extract nutrients and absorb energy, and expelled in the remaining waste as feces. The mouth, esophagus, stomach and intestines are ...
