Where To Download Mg 15 Machine Gun Manual

The MG 15 was developed in the 1920s by Louis Strange. It was later copied directly by the Japanese and redesignated the Type 98 in 1937. It was replaced in the early 1940s by the newer aircraft guns like the MG 131. It was then employed mainly by Luftwaffe ground crews and other German ground forces.

To give you an idea of the amount of work involved in translating the old German, click for a picture of an original page from an MG 08/15 manual. You'll see why translating these manuals can take a ridiculous amount of time to complete. The latest manuals are: 1. War Games: See the Reenacting page. 2.

German Manuals in English

The MG 15 was developed from the MG 30 which was designed by Rheinmetall. Though it shares the MG 15 designation with the earlier gun built by Bergmann, the MG 15nA has nothing in common with the World War II gun except the model number. The World War I gun used a tipping lock system while the WWII aircraft gun uses a rotating bolt/locking.
